

FEATURES

- Eterna peripheral stent is made from braided nitinol wire into a specific pattern, which offers a kink-free design and superior radial force.
- The device is indicated for treatment of blockages at various peripheral vessels like Iliac, SFA, subclavian vessels.
- The device comes with superior radiopacity and has 8 markers, 3 on each end of the device and 2 in the middle, making it very easy to locate and place in the vessels.
- The braided pattern ensures that it doesn't kink even in extreme bending of the arteries and retains the overall structure and form of the vessel.
- Achieves very good flexibility around sharp curves and artery deformation
