

Allied 777

Emergency Resuscitation Kit with Ventilator

A customized solution to cater all your emergency needs

Meets carry-on Military regulations, standards and NATO guidelines

The Allied Resuscitation, Suction & Intubation outfit ensures that you are instantly ready with the right equipment to establish and maintain a patient airway in a respiratory arrest victim when immediate medical care is not possible.

Specially Designed Packaging

- Unbreakable
- Watertight
- Dust proof
- Chemical resistant and corrosion proof case
- Light Weight Strong HPX Resin Case
- Dual Suction Capability: The ventilator unit has an in-built cylinder driven suction and the kit is additionally supplied with manual suction pump

Ergonomic Design

- Separate compartment for drugs, intubation accessories & equipment
- Comfortable side handles
- Durable caster wheels & telescoping handles
- Double-Layered, soft grip handle

Ideal for Use

Ambulances

Disaster Management

War Fields

Rural Area Camps

Ventilator Technical Specification: Meditec 1200

Pneumatically Driven Ventilator
Pipeline or Cylinder Operated
with a Non-return Valve
IPPV Ventilation Mode

ii i v vontilation ivic

Adult & Pediatric

Manual Override Function

Bronchial Suction

In-built battery

I:E Ratio

Oxygen Concentration

Minute Volume with 60% O₂

Minute Volume with 100% O,

Breathing Frequency (Adjustable)

Add on PEEP (Optional)

Pressure Manometer

Noise

Cylinder Time (when fully charged)

Gas Pressure

Electronically Controlled Alarm System

Low Pressure Alarm (Apnea Alarm)

High Pressure Alarm (Barotrauma)

Tailormade Emergency Resuscitation Kit

Laryngoscope:

Laryngoscope enables correct insertion without abrading the upper airway

Finger Tip Pulse Oximeter:

- Compact, comfortable and simple operation
- Large and high resolution LCD screen with backlight
- Automatic Power Off
- Low power consumption, more than 30 hours continuous operation

Thermoscan:

- No contact, no cleaning
- Easy to operate
- Fast and accurate results
- Fever alarm
- Backlight LCD digital display
- Auto Off

ECG Machine:

- Ergonomic, light & compact design
- Fast measurement within 30secs
- Auto evaluation of heart health condition
- Large and high resolution display
- Easy and convenient to operate and carry
- Automatic Power Off
- The stored ECG records can help make early diagnosis. Hence timely detection, early prevention

Silicon Resuscitators:

Silicon Resuscitators are designed for manual ventilation of neonates through adults. It is semi-transparent and comes with a pressure limitation valve.

Hand Suction:

Manually operated Hand Suction Pump to aspirate mucus, blood and other secretions from the entire airway of Adult, Child or Infants.
