

COMPREHENSIVE
ULTRASOUND SERIES

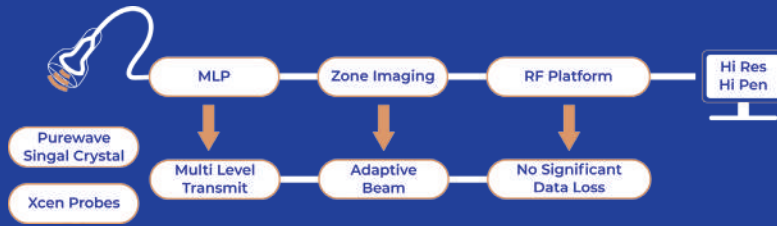

SonoRad

SonoRad V60

Supreme Performance Color Doppler

Lucid Platform

The **Sonorad V60** integrates the new adaptive beam correction technology with high-performance hardware architecture, increasing the useful image information, providing excellent penetration and good signal to noise ratio.

SonoRad V60

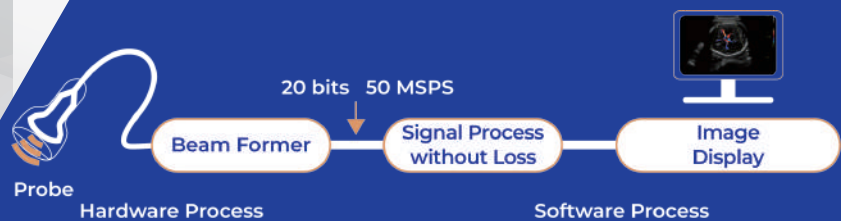

SonoRad V40

SonoRad V40

A Superior Color Doppler for Precise Diagnosis!

Innovative RF Platform

With Triviton's Innovative RF Platform, **SonoRad V40** can acquire 40 times of raw signal for back-end process which represents better resolution, powerful post process capability and hence delivers superior image quality.

SonoRad V20

A Superior & Reliable Color Doppler
for Your Diagnostic Needs!

Equipped with innovative RF Platform, **SonoRad V20** delivers superior quality images with excellent clinical value in a wide range of applications.

- Excellent Image Quality
- Streamlined Workflow
- Ergonomic Design
- Superior Clinical Value

SonoRad V20

SonoRad V10

SonoRad V10

An All-Rounder Color Doppler for
your Diagnostic Needs!

Intelligent software for OB offers High efficiency and precise measurement tools with One step to obtain the results.

- Super responsive Touch Panel
- Ergonomic tilting ensures all dimensional, multi-angle visualization
- Intuitive Control Panel & Touch Panel Layout
- Auto measurements: BPD, HC, AC, FL, NT.

SonoRad V9 Premium

Versatile Color Doppler

SonoRad V9 Premium with innovative RF platform and comprehensive Image processing Image set, SonoRad V9 Premium offers superior Image quality in a wide range of clinical applications.

- Excellent Image Quality
- Advance Image Technology
- Versatile Clinical Application
- Efficient Workflow

SonoRad V9

SonoRad V8
Premium

SonoRad V8 Premium

Slim - Smart - Significant - Streamlined

SonoRad V8 Premium, a slim console color doppler system, offers ideal patient care with its easy mobility, smart features, significant performance and streamlined workflow, to strengthen the clinical confidence and speed the diagnostic decision.

- 19" LED Monitor
- HIP graf & image rotation
- Facing front printer socket
- Rotatable keyboard: -45°~ 45°

SonoRad K40

Portable Color Doppler for Precise diagnosis

SonoRad K40 is powered by Advanced Images and precise measurements in a compact, Ultra-Portable form.

- The unique RF platform provides advanced Image quality in resolution & contrast.
- Perfect 3D/4D technology with STIC, Mcut and Auto NT, fulfill all obstetric application.

SonoRad K40

SonoRad K9

SonoRad K9

A Portable & Reliable Color Doppler for Diagnostic Needs!

Triviron SonoRad K9 offers excellent clinical value for a wide range of applications.

- Probe Holder (2 Probe Connectors)
- DICOM 3.0
- Rotatable LED monitor (0~30°): for different viewing angles

SonoRad K2

A Portable & Reliable ultrasound for Diagnostic Needs!

Triviron SonoRad K2, is a Portable and compact Ultrasound that offers excellent Clinical Value in a wide range of Clinical Applications.

- 12 inch rotatable LED monitor (0~30°) with different viewing angles
- DICOM* 3.0, USB, One Key to Save
