

# GLITZ

*Direct In-Scope Suction System*

Reinventing the RIRS procedure

# DISS: A Solution to RIRS Challenges

Reduced surgery time

Reduced patient recovery time

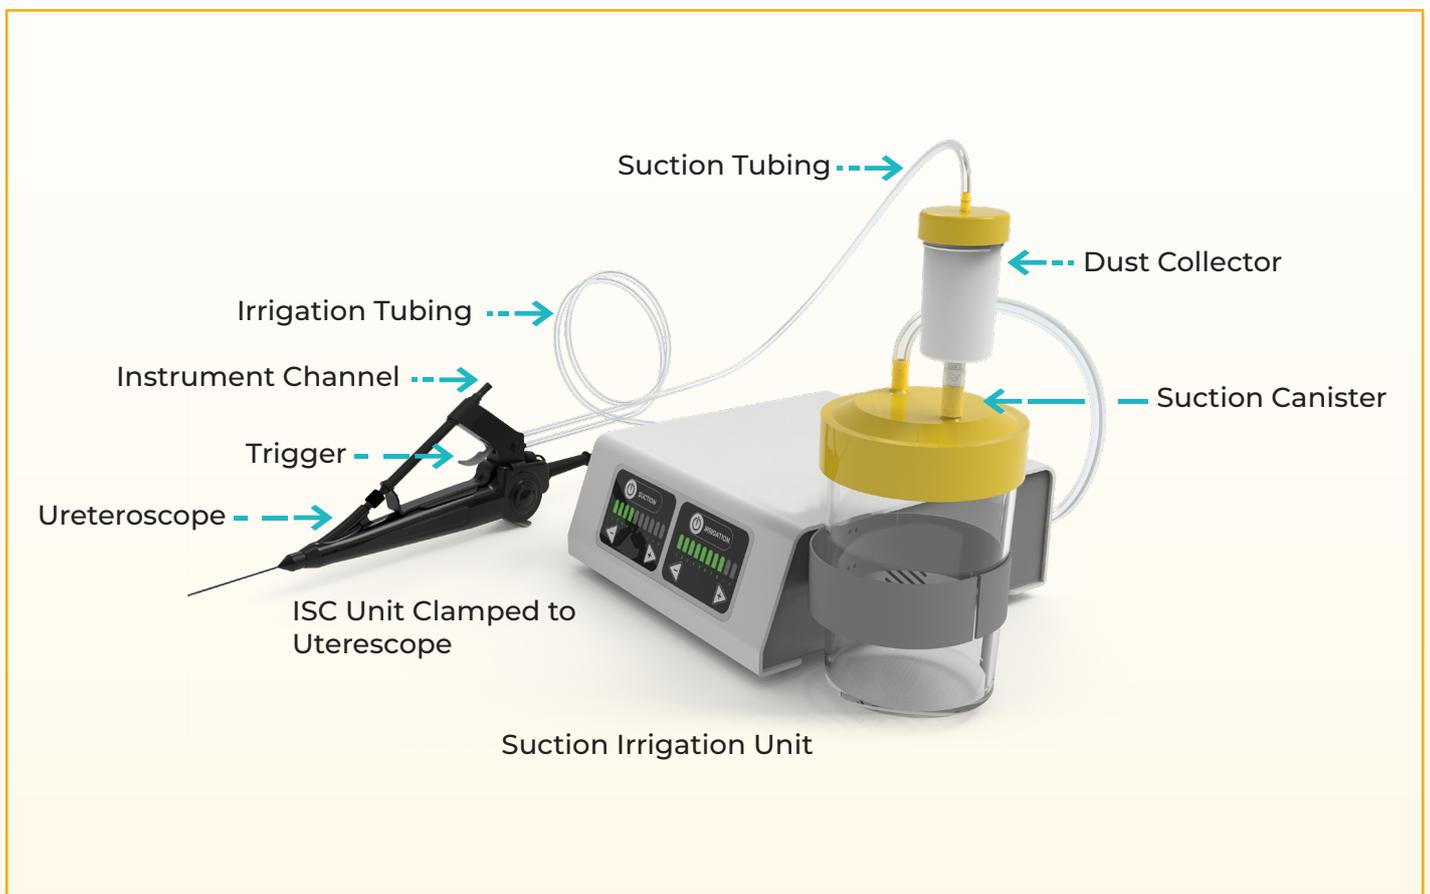

Reduced cost per surgery

Reduced post surgery hospital visit

## GLITZ- Direct In-Scope Suction System

The novel approach facilitating the simultaneous use of a working channel for lithotripsy, irrigation, and suction while giving the surgeon complete control at his/her fingertip. **Glitz** enables aspirating the stone dust through the working channel of a ureteroscope.

## Pump Unit

- Comprises two distinct sub-systems for suction and irrigation operations.
  - Suction System
  - Irrigation System
- Enables both gravity based Irrigation and irrigation through automated control irrigation unit.

## Integrated Scope Connector (ISC)

The single-use ergonomically designed **Integrated Scope Connector (ISC)** attaches to single-use 7.5 Fr or 9 Fr Flexible Ureteroscope.

Integrated Scope Connector

Integrated Scope Connector with Suction and Irrigation Tubing

# Precised & controlled procedure at your fingertips
